Communication, Time Management, Versatility, Teamwork

# Projects

## Google Projects

Google Benchmarking Projects (SecureKloud Tech. Ltd.) – Doc Parsing, Doc Classification, Text Classification, Custom ML Models, and Large Language Models.

- Developed Python scripts to integrate with GCP, AWS, Azure and other services via REST APIs and SDKs.
- Processed API JSON responses to generate structured CSV/Excel reports.
- Computed benchmarking metrics (Precision, Recall, F1-Score) using Ground Truth vs. Product Data.
- Analyzed product performance, identified gaps, suggested improvements, and contributed to final benchmarking reports for clients.
- Tech: Pandas, NumPy, GCP SDK, boto3, Azure SDK, requests

## AI-ML SaaS Products

At SecureKloud Tech Ltd working as a python backend developer and in some cases helped to conceptualize & design product from scratch, Worked with Flask, GCP, SQL, MySQL, Micro-Services, RESTful APIs, SQLAlchemy, Git etc.

Also helped to collect & process information/data from Internet via web scrapping for ML Team to build Custom ML Models.

Tech: Flask, SQLAlchemy, GCP, RESTful APIs, FastAPI, MySQL, GCP SDK, GenAi, RAG

## Robbin

<https://github.com/Nandraj/Robbin>

Work/Task Management Tool based on Django Python Web Framework.

Tech: Django, OOPs, Postgresql, Bootstrap, HTML, CSS

## Eldena

Django+Bootstrap full stack app to manage Kids Batches, Program Associates, Donors and Kids Memories (Images & videos) Tech: Python, OOPs, Django, Postgres, Bootstrap

## Stylista Fashion Shop

Single vendor e-commerce platform.

Tech: Flask, SQLAlchemy, RESTful APIs, JS, jQuery, HTML & CSS, MySQL

## 3R Kids Android App

[https://github.com/Nandraj/ThreeR\\_Kids\\_Nativescript\\_App](https://github.com/Nandraj/ThreeR_Kids_Nativescript_App)

Interactive Multilingual Kids Education App written in Nativescript JavaScript Framework

Tech: JS, Nativescript, CSS, XML

## NR GST Tools

[https://github.com/Nandraj/GSTIndia/tree/master/GST\\_Tools\\_Flask\\_App](https://github.com/Nandraj/GSTIndia/tree/master/GST_Tools_Flask_App)

Flask App having GST related tools which has functionality for excel to json conversation and excel reformatting.

## GST Task Manager

Task Management and other GST related tools in the form of Flask App that can be run on LAN or can be deployed on cloud.

Tech: Flask, MySQL, HTML&CSS, Bootstrap, JS, jQuery

## GST Auto

[https://github.com/Nandraj/GST\\_Auto\\_PyQt#gst-auto-pyqt5-version](https://github.com/Nandraj/GST_Auto_PyQt#gst-auto-pyqt5-version)

GST Client Mgt and auto login (with selenium) desktop tool. Developed 2 versions - PyQt & Eel
